### PROFESSIONAL EXPERIENCE

Aiden AI, Bangalore, IND

Aug 2023 – Present

#### Senior Product Engineer

- Built an end-to-end interface testing framework that auto-generates test data from schemas/sample inputs, routes data via source connectors, captures outputs from target systems, and performs automated file-level comparisons between legacy and modern interfaces to ensure functional parity.
- Developed a custom ML-driven testing agent for model-based front-end validation that interprets task lists for a given URL, autonomously executes step-by-step user flows, and captures screenshot evidence at each stage to verify UI behavior and workflow integrity.
- Enabled seamless migration of legacy interfaces to modern platforms by implementing machine learning-based automation for data transformation, mapping generation, and validation workflows.
- Designed and implemented an end-to-end ML-enabled data migration framework that extracts schemas, generates approved mappings, and constructs scalable batch pipelines with validation controls to ensure reliable and compliant data transfer.

Infosys, Bangalore, IND

Apr 2021 – Aug 2023

#### System Engineer

- Led the development of a platform facilitating the seamless migration of automation workflows between multiple RPA products, utilizing Angular 14, Spring Boot (Java), and MySQL.
- Designed and developed reusable bots to automate various business processes across multiple domains, enhancing efficiency and scalability, utilizing Java, Python.
- Gained proficiency in multiple technologies, including Java, SQL, and Angular, through extensive training. Developed applications as part of project work.
- Recognized as a top performer in Infosys Training, earning additional incentives for exceptional performance over one year.
